

# ISE CASE STUDY: Healthcare Training

When St. Vincent Healthcare decided to upgrade the furniture in their nurses training facility, they knew that a different approach was needed. Previously, they had used conference style tables, but with all the technology going into healthcare, a more high tech direction was necessary.

The desk that they selected was The All-in-One Desk from ISE. This unique desk added a new dimension to the nurses training facility - a standard desk that converts in seconds to a computer desk - that immediately transformed it into a high tech multi-use facility.

Other advantages of The All-in-One Desk was the simple operation of the electric flat screen lift technology, and the store-away wire management.
